## Description

### Archeological Aspect of an Ancient Roman Legend

When the stories about the primordia Urbis, which passed for a long time as the history of Rome, have been proven in a great part to be mere legends, it may seem rather audacious to claim historical value for a tale, too profane even to be called a legend that of the courtesan Larentia and the god Hercules. In fantasizing our story we find, however, elements of religious beliefs with parallels in the history of ancient religions and modern folklore.
